SWIVEL BASE

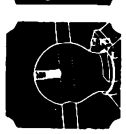
No.	Wgt. Lbs.	Jaw In.	Vise Opens	List
234	89	4	5½	$21.00
235	112	5	6	32.50

REASONS WHY

1 Designed from 15 to 30 pounds heavier than the regular Machinist Vise of corresponding size and carrying a handy anvil for minor straightening and bending operations.

2 Ring and Wedge nut swivel base construction assures 360 degrees gripping power.

3 Set screw and tension spring hold handle wherever placed. It can't slip down and catch the hands.



4 Outside saddle permits easy removal of screw for oiling.

5 Solid Underportion makes the vise just so much stronger.

6 Steel jaws are carefully milled to fit and *pinned on.* They *cannot work loose.* But can be removed easily if necessary.
